MANDATORY NOTICE OF EXTERMINATION

ATTENTION ALL RESIDENTS:

A MANDATORY EXTERMINATION OF YOUR BUILDING WILL BE DONE ON ______________. ALL RESIDENTS MUST COMPLY WITH THE FOLLOWING PROCEDURES TO INSURE AN EFFECTIVE PEST CONTROL SERVICE. ANY EXCEPTIONS MUST BE CLEARED THROUGH MANAGEMENT PRIOR TO TREATMENT.

1. ALL items must be removed from ALL cabinets and drawers in the kitchen and bathroom areas PRIOR to treatment. Treatment is most effective if these items are placed in another room – NOT on the counters of these rooms.

2. Remove all paper and plastic bags, or any items stored by the side of the refrigerator, stove, and other appliance areas. Please remove trash and debris from these areas.

3. All pet food and water must be removed from these areas.

4. ALL PETS must be removed from your home or placed in a closed bedroom with a note of the door. If we cannot enter your apartment due to your pet, management will be immediately notified. ALL FISH TANKS must be covered and the filters must be turned off.

5. All treated areas must be completely dry before you place the items back in the cabinets. DO NOT wash the cabinets or the effectiveness will be reduced. Dry wipe all dead insects and egg capsules and dispose of them. The insects may crawl for a few days after treatment as they are exposed to the chemicals. If the infestation was a heavy one, you may need to follow the above procedures weekly until the problem is solved.

6. MANAGEMENT WILL BE INFORMED AS TO THE COMPLIANCE OF THESE PROCEDURES.

YOUR COOPERATION WILL INSURE A PEST FREE ENVIRONMENT FOR ALL RESIDENTS.

THANK YOU
